

If You Aren't Happy and Successful, Neither Are We

Choosing the right software is critical to finding a better way to get work done. To help you decide if @task is right for your organization, we offer a 30-day Prepaid Pilot and Consultation Program that enables you to thoroughly evaluate @task within your project environment. You'll be able to create, manage, and execute on real projects before you purchase an @task license.

What's Included?

- 15 days of consulting over a 4-week period*
- Up to 25 licenses
- Requirements analysis
- Best practices @task design and configuration
- Pilot user training and 2 weeks of Pilot testing designed to meet your Success Criteria
- Upon completion of the Pilot Program, all project data will seamlessly transfer to a production instance of @task
